

Magic Diagonal Quilt

80 five inch squares of fabric (use at least 9 different fabrics in a variety of lights and darks.)

- Sew squares together in rows of 8 squares across.
- Press all seams in one direction then on the next row press all the seams in the opposite direction.
- Make 10 rows down.
- Sew rows one and two together and press the seams down, continue until the top is pieced.

Making sure the top is thoroughly pressed makes the cutting easier.

Magic cutting for the diagonal quilt!!!

Follow the illustrations for the cutting and "resewing" of the top.

TIP: Draw a diagonal line for the first cut and stay stitch on either side of the line before cutting to prevent stretching of the bias edges.
